SETAKOLOR INFINITE COLOURS

TECHNICAL BOOK

SETAKOLOR INFINITE COLOURS

It is the new high technology oil color system, which guarantees duration of the color and a great penetration inside the hair to get the perfect result.

The proactives allow a protective and reconstructive effect on the hair.

It is an innovative color dye, based on a new concept of mixing made directly by the hairdresser.

The SERICIN is produced during the processing of raw silk, which become pure and concentrate thanks to the complicated process to get SETAKOL®. Because its own proprieties, SETAKOL® binds itself very strong to the keratin of the skin and the hair created a protective multifunctional film. In this way it remodels the structure of the hair.
